# InterSystems Caché Installation Setup

---

This section illustrates step-by-step installation of **CACHE**, **VISTA** and Bar Code Medication Administration Backup System (BCBU) Patch PSB\*2\*17 on a PC Workstation.

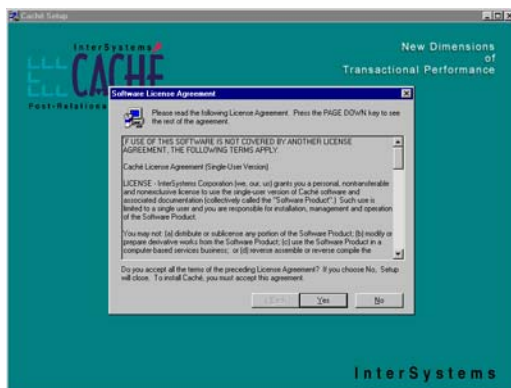

Insert the Caché CD supplied by InterSystems into the workstation. Caché setup should start automatically, if not, navigate to the CD Rom Drive and select Set Up. Double click the Install button and accept the defaults offered by the wizard.

**Figure 1**

Answer **YES** to accepting the License Agreement and continue with the installation.

**Figure 2**

Type **CACHE** as the Installation name as shown in the following screen.

# InterSystems Caché Installation Setup

---

**Figure 3**

Accept the Standard setup and click **Next**.

**Figure 4**

Continue following the instructions and accept the defaults for your system.

**Figure 5**

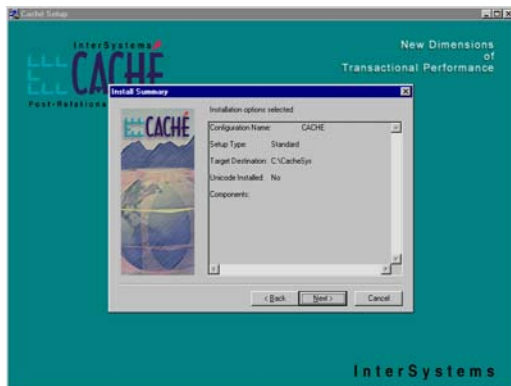

# InterSystems Caché Installation Setup

---

**Figure 6**

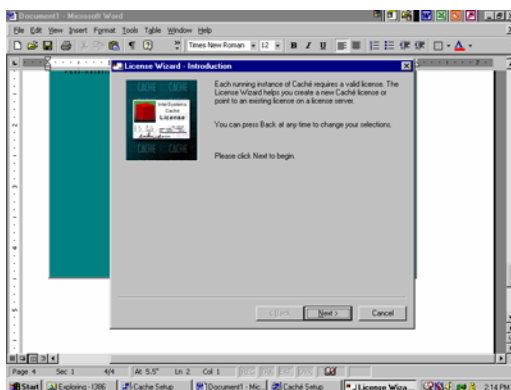

If the following message appears, follow the instructions and enter the licensing information from InterSystems.

**Figure 7**

**Figure 8**

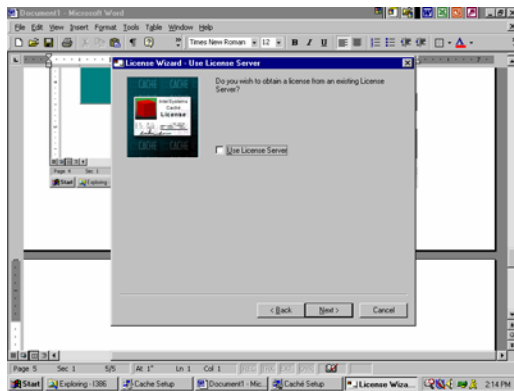

# InterSystems Caché Installation Setup

---

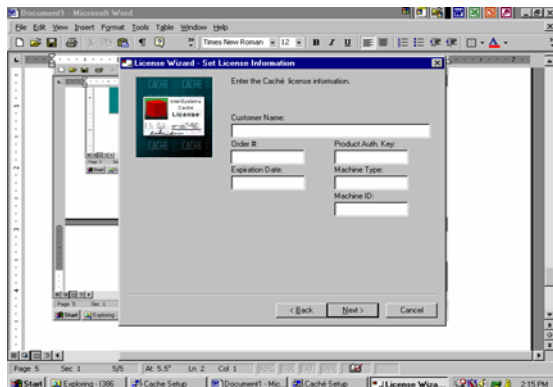

Type in the licensing information as requested in the following screens.

**Figure 9**

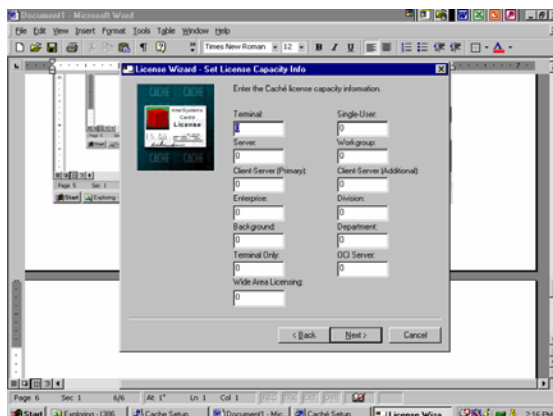

Make sure the Use License Server is **NOT** selected. Fill out the information with the appropriate information as it pertains to your facility, click **NEXT** to continue.

**Figure 10**

Enter the license capacity information and then click **NEXT** to continue.

**Figure 11**

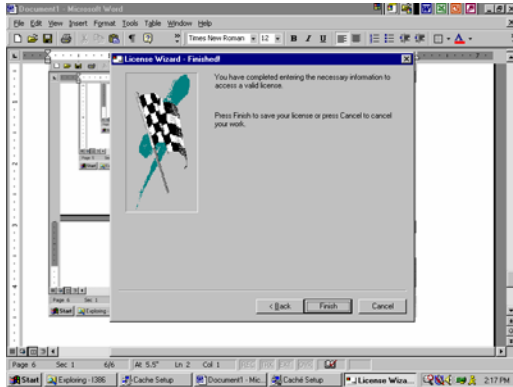

# InterSystems Caché Installation Setup

---

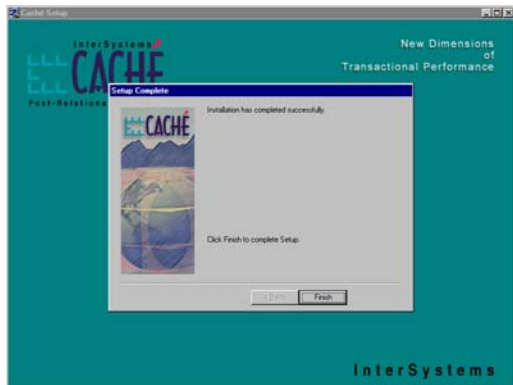

When the licensing information has been entered correctly, the following screen will appear. Click **Finish** to save the licensing information.

**Figure 12**

Click **Finish** on the following screen, to complete the installation.

**Figure 13**

Upon the completion of a successful installation, a "Blue Cube" will appear on the PC toolbar in the lower right hand side of the screen.

**Figure 14**

Right clicking on the cube will display the menu options for CACHÉ.

# InterSystems Caché Installation Setup

---

**Figure 15**

## CACHÉ Configuration Manager

In order to use CACHÉ, it must be configured with databases, namespaces and routines. This is done by using the Configuration Manager located on the CACHÉ menu options.

**Figure 16**

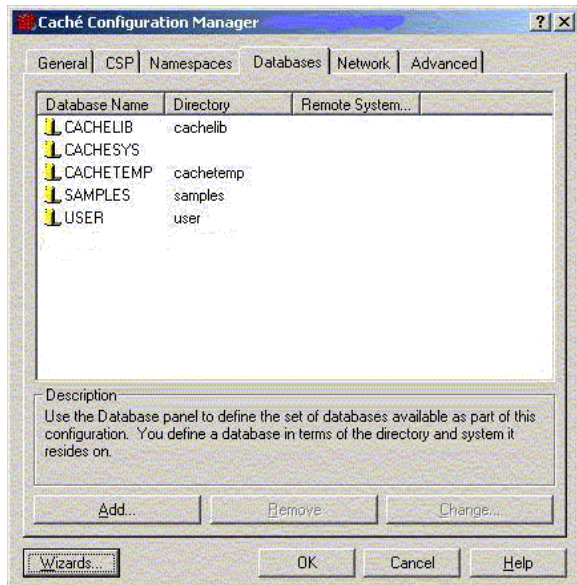

# InterSystems Caché Installation Setup

---

## Adding a Database

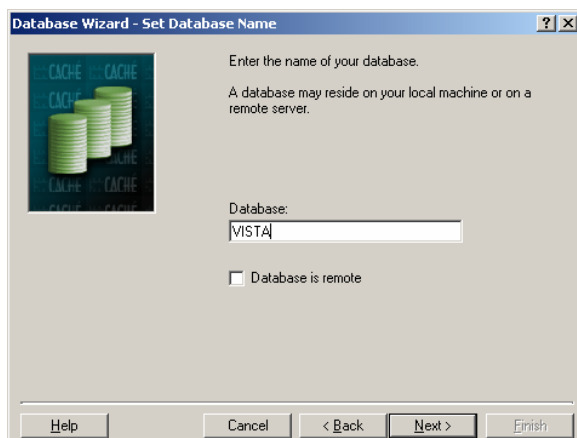

The first step is to add a Database. After selecting Configuration Manager from the CACHE menu the following screen will appear.

**Figure 17**

Select the Database tab and then click on the **Add** button. Type **VISTA** as the name of the database and click **Next**.

**Figure 18**

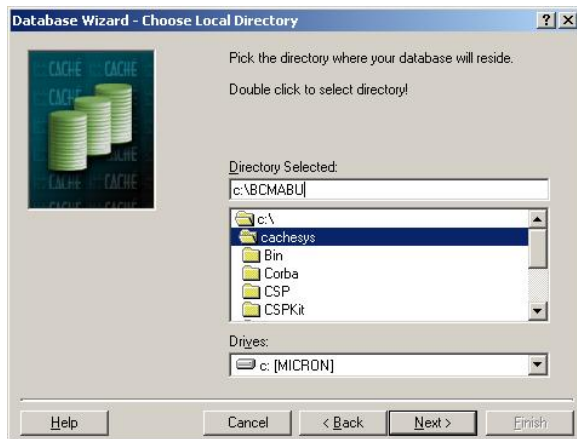

Enter C:\BCMABU into the Directory Selected field, click **NEXT** to continue.

# InterSystems Caché Installation Setup

---

**Figure 19**

If directory does not exist you will see the following screen, click on **YES** to continue.

**Figure 20**

**Figure 21**

Click FINISH on the following screen.

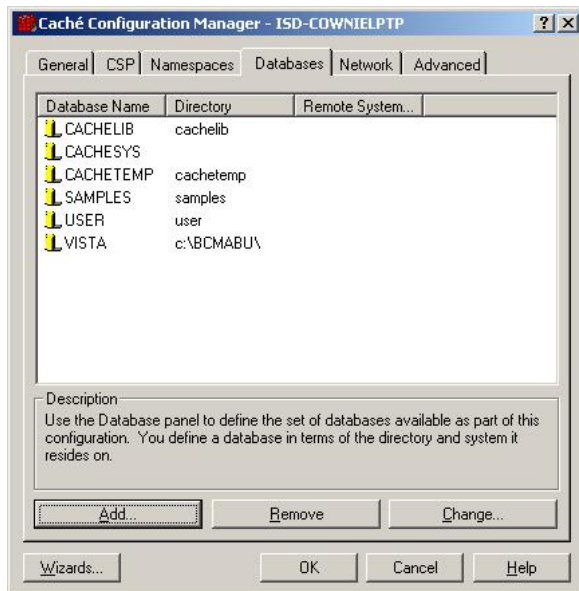

The newly created database should now appear in the box below as C:\BCMABU.

# InterSystems Caché Installation Setup

---

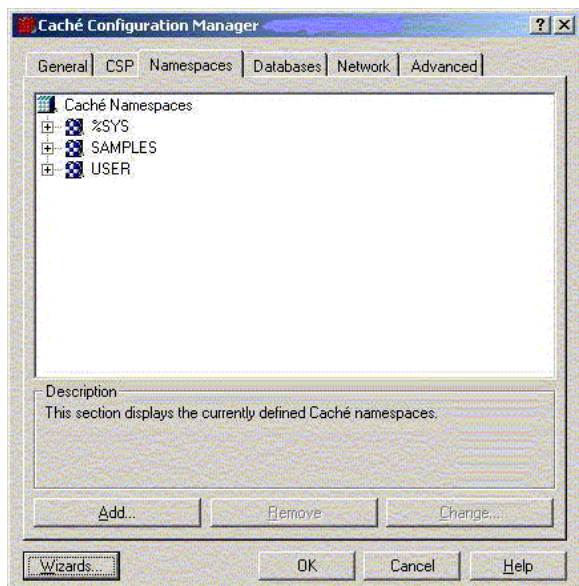

**Figure 22**

## Adding a Namespace

Using Caché Configuration Manager, click on the **Namespaces** tab to create a namespace entitled, **VISTA**, and attach it with the **VISTA** database. Click **Add** to begin.

**Figure 23**

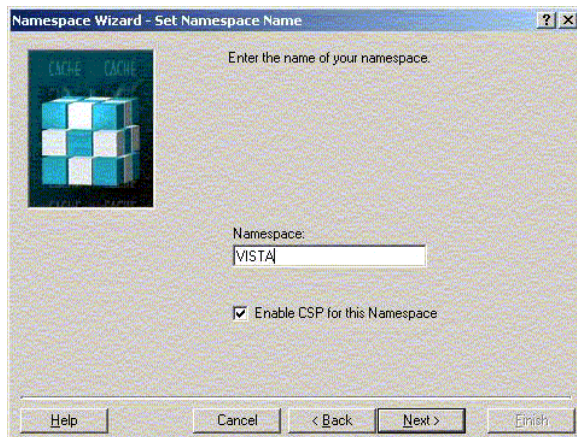

Type **VISTA** as the namespace and continue by clicking **Next**.

# InterSystems Caché Installation Setup

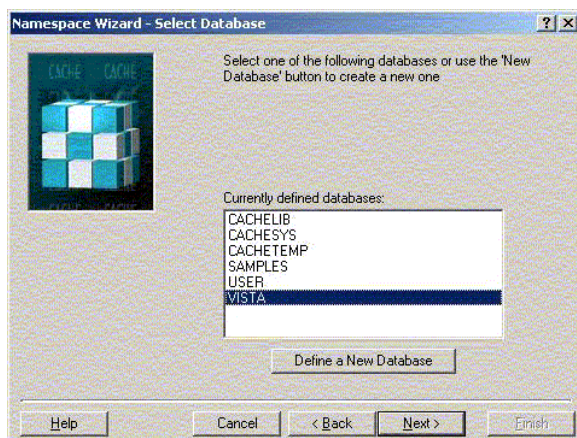

---

**Figure 24**

**VISTA** should appear as the currently defined database. Select and click **NEXT** to continue.

**Figure 25**

Click **FINISH** to accept the configuration.

**Figure 26**

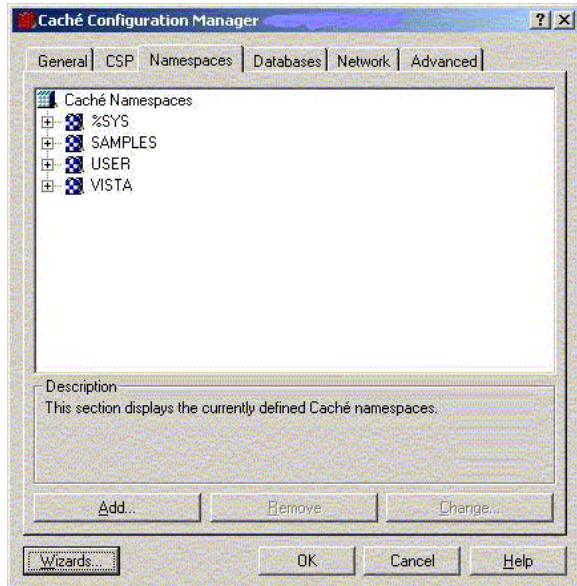

# InterSystems Caché Installation Setup

---

**VISTA** namespace should be seen in the listing of Caché Namespaces.

**Figure 27**

## Global and Routine Mapping

Global and Routine Mappings are created in the same manner and uses the namespace, **VISTA**, which was just created.

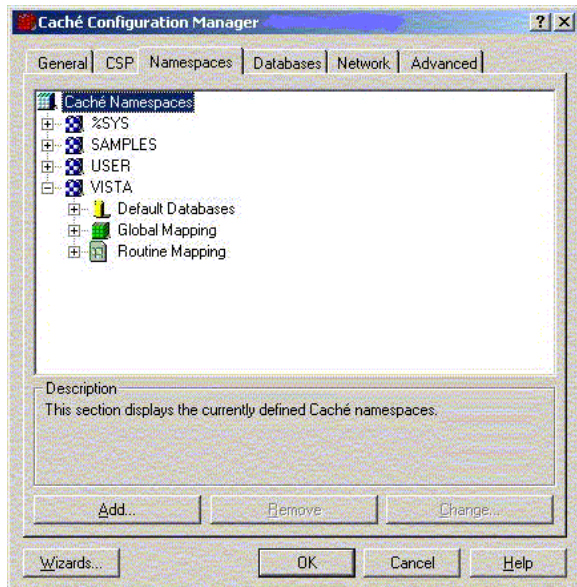

### Global Mapping

Click the **VISTA** namespace icon to list the options: Default Databases, Global Mapping and Routine Mapping. Highlight the Global Mapping Icon. Then click the **Add** button, to create the global mapping definition as shown in the following slides.

# InterSystems Caché Installation Setup

---

Figure 28

Create the "%Z\*" global map definitions by typing %Z\* in the space provided. Click **OK** and continue.

Figure 29

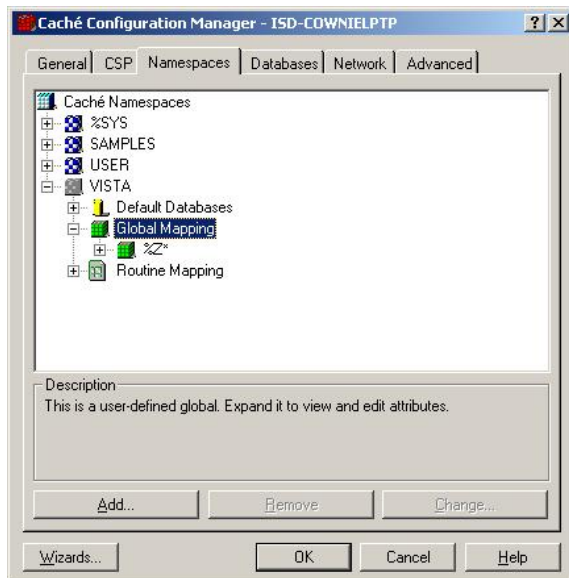

Now if Global Mapping is selected, the mapping definition created is visible.

# InterSystems Caché Installation Setup

---

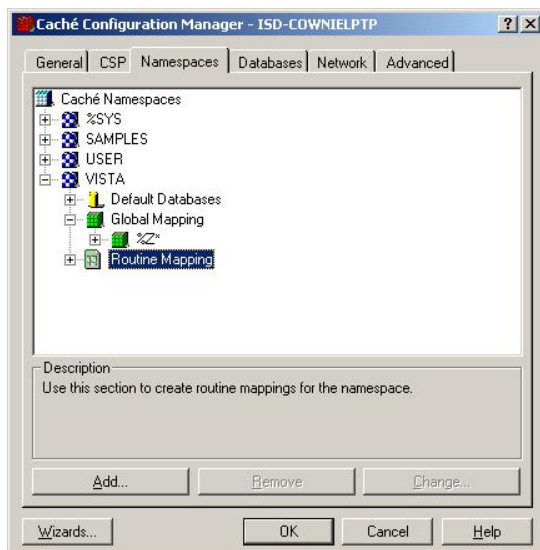

Figure 30

## Routine Mapping

The next screens are example of routine mapping and are created in the same manner. Select routine mapping and click on the **Add** button for each one to be added.

Figure 31

Type in the first routine, **%DT\*** in the space provided.

# Intersystems Caché Installation Setup

---

**Figure 32**

Type in routine **%RCR** to create the next routine mapping.

**Figure 33**

Type in the next routine: **%XU\***

**Figure 34**

The last routine is: **%Z\***

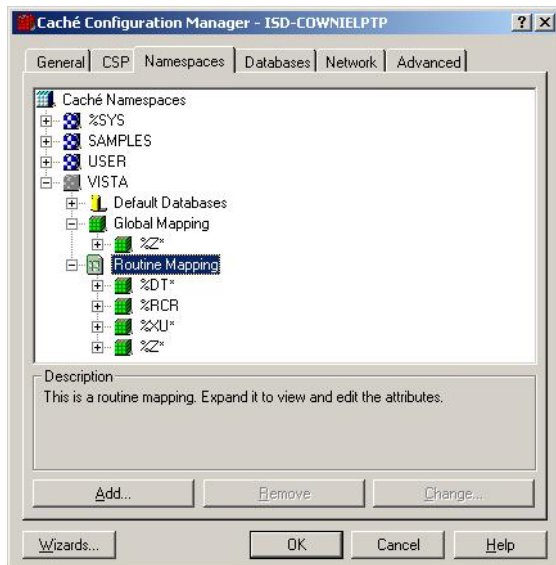

**Figure 35**

Highlight Routine Mapping and icons for the four routines just created will be seen. Click **OK**.

# InterSystems Caché Installation Setup

Figure 36

Now select **Activate** to save the changes and continue.

Figure 37

Shut down CACHÉ as shown in the following examples.

Figure 38

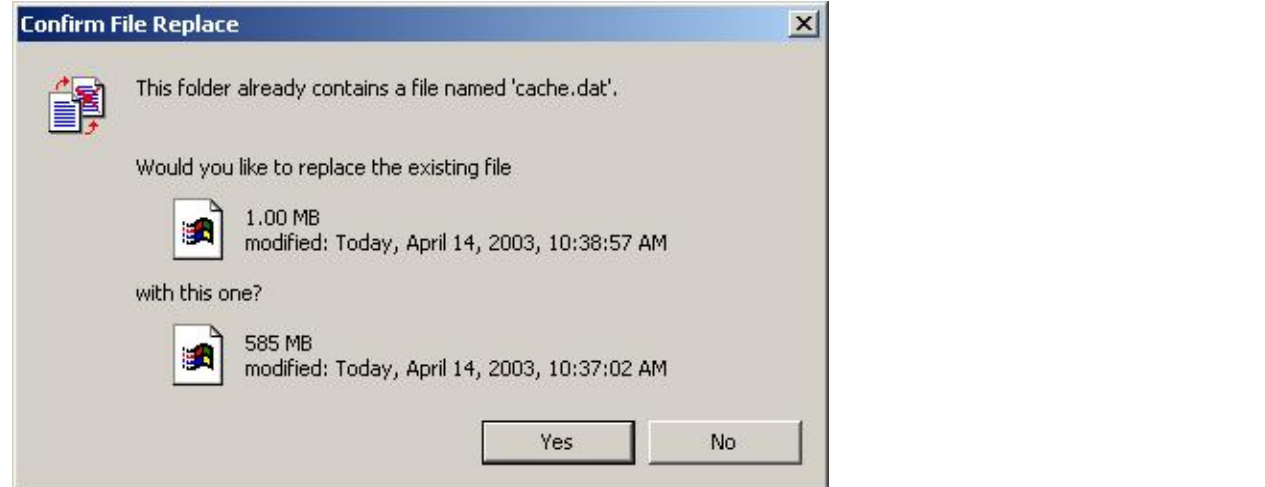

Select Shut Down and **OK**.

# Intersystems Caché Installation Setup

---

**Figure 43**

Click the Read-only attribute to deselect it.

**Figure 44**

Click on OK and it will close the box and save your changes.

# Intersystems Caché Installation Setup

---

## Telnet Instructions

Start Cachè.

**Figure 45**

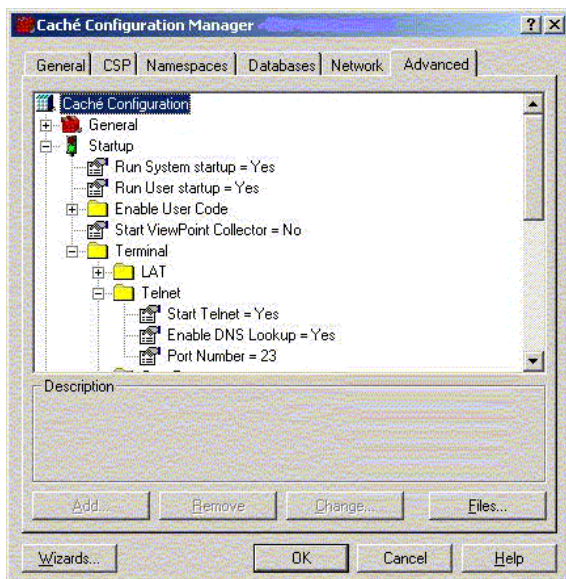

**Figure 46**

Select Cachè Configuration Manager and select the ADVANCE tab. Check to ensure Telnet is set to YES as shown on the following screen.

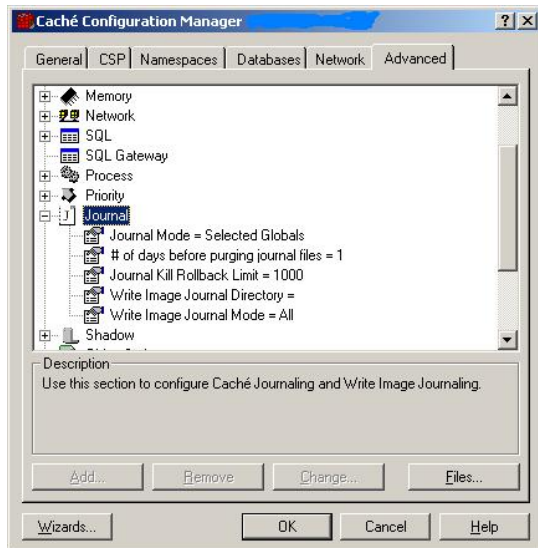

**Figure 47**

# InterSystems Caché Installation Setup

From the Cache Configuration Manager, Advance tab also check to ensure Journaling is set as shown on the following screen.

**Figure 48**

Using the Cachè menu options, open Cachè Explorer. NOTE: Do not open Windows Explorer.

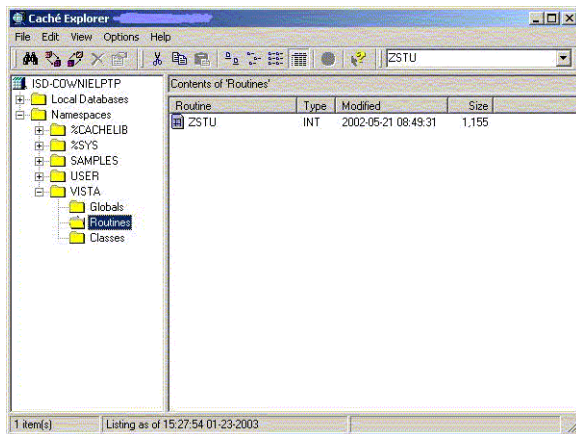

**Figure 49**

Locate the Routines Folder located within the **VISTA** folder.

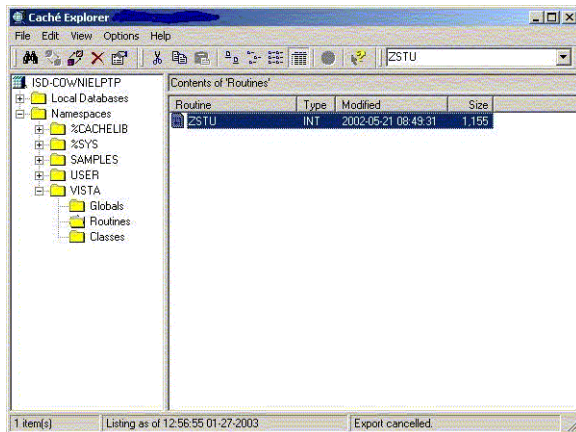

**Figure 50**

# InterSystems Caché Installation Setup

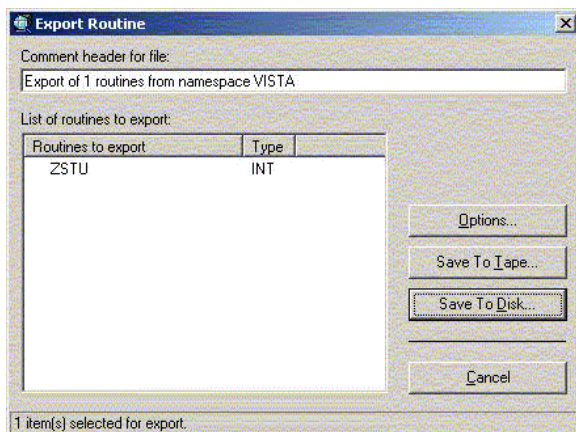

Locate the routine ZSTU and select it.

**Figure 51**

Export the routine ZSTU from the routine section of the namespace **VISTA** to the hard drive of the PC.

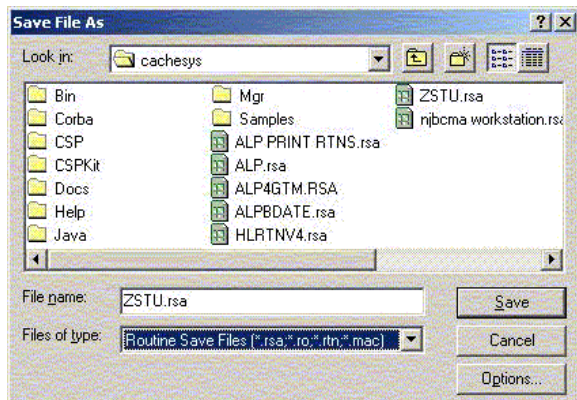

**Figure 52**

Save as ZSTU.rsa by clicking the "Save to Disk" button.

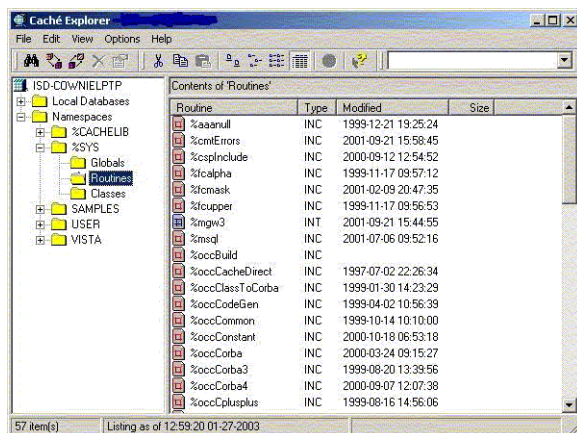

# InterSystems Caché Installation Setup

**Figure 53**

Then import this routine to the routine section of the namespace %SYS. Select the folder Routines and open the folder.

**Figure 54**

**Figure 55**

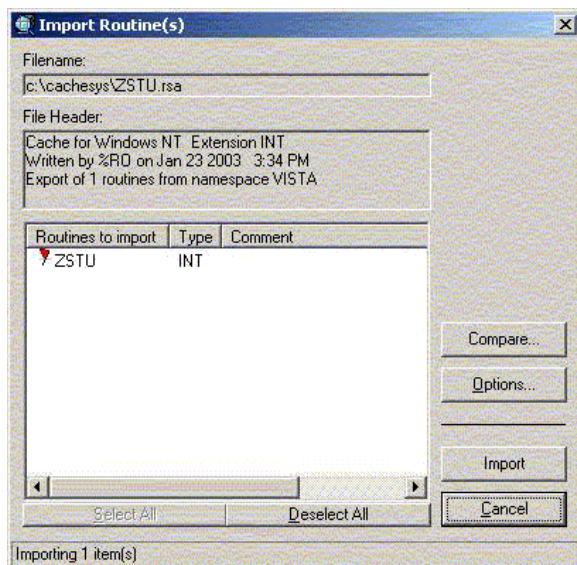

Select ZSTU.rsa and click Open.

# InterSystems Caché Installation Setup

---

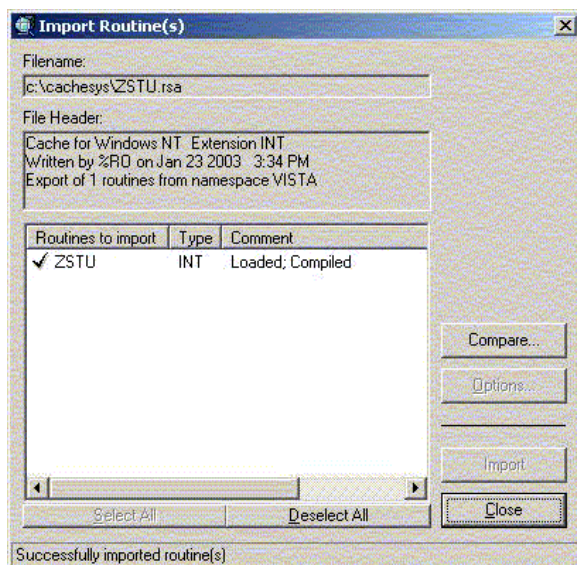

**Figure 56**

Click on Import.

The next screen shows the import has completed successfully.

**Figure 57**

# InterSystems Caché Installation Setup

## Setting Up Telnet and Terminal Users

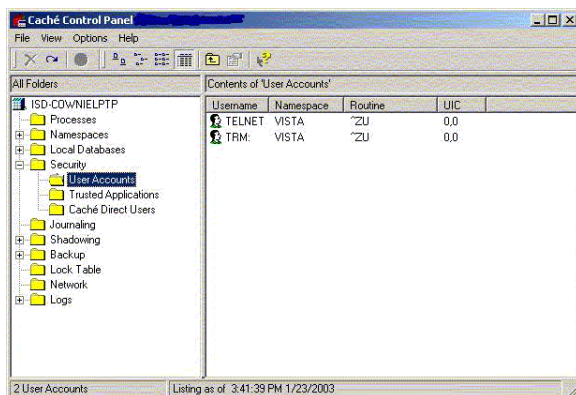

Using the Control Panel set up the Telnet and Terminal Users to start in **VISTA** namespace under the routine ZU. Right click on the blue cube located in the tool tray and go to Control Panel.

Figure 58

Expand the Security folder by clicking on the Plus (+) sign to the left and select User Account. User Accounts will be displayed.

Figure 59

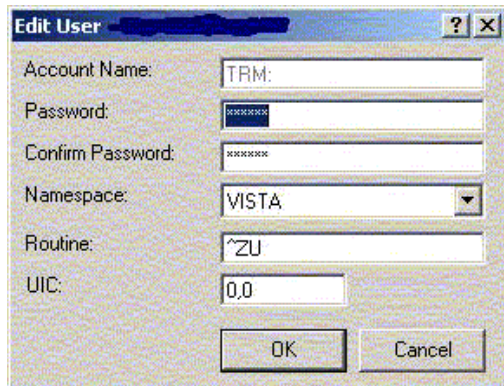

Select the user that needs to be edited, by double clicking on that user. Make sure the namespace is set to **VISTA** and the routine to ^ZU.

# InterSystems Caché Installation Setup

---

Figure 60

**IMPORTANT NOTE:** Stop and restart Caché. This will be the BCMA Backup Application. The routine ZSTU start up routine will automatically start up TaskManager.

After this step, ensure you have removed the CACHÉ Configuration cube from the tool tray and startup menu of all users. It will be kept on the Network Administrator profile and those programmers that will be working with the system. All users should have access to the short cut for Telnet.

## Setting up the BCMA Shortcut

Right click anywhere on the desktop, select New/Shortcut.

Figure 61

Enter the command line `C:\CacheSys\Bin\css.exe CTERMINAL CACHÉ` and click Next.

# Intersystems Caché Installation Setup

---

**Figure 62**

**Figure 63**

Enter desired shortcut name and click Finish.

**Figure 64**

Double-click the BCMA Backup shortcut cube. This will drop you into the Backup system on the PC Workstation. Use the appropriate access and verify code pair to access the system.
